

World Class Maths Tests

On March 25th Mrs Tyerman and Mr Selley, our school Governor, accompanied some of the Gifted & Talented children to the World Class Maths Tests.

World Class Tests are 'on-line' tests to challenge able pupils. The tests are available to pupils between the ages of 8 and 14 years and are designed to test student's ability to apply skills, knowledge and deductive reasoning to solve problems.

The tests were held at the Inspire2Learn Centre in Middlesbrough. The test was in two parts - a computer based section and paper based tasks. The children had up to 60 minutes for each part. The tests were challenging but the students really enjoyed doing them!

Last week we received the results of the tests. We are absolutely delighted with the achievements of all the students who took part- many of them achieving a distinction! St Peter's has some outstanding mathematicians who we are very proud of!
