

Champions once again!

We have once again lifted the Lego League trophy for the second year running. The 2015 Trash Trek challenge saw 16 primary and secondary schools go head to head in the robot challenge at Teesside University. With some superb programming and nerves of steel the St Peter's crew amassed a giant 407 points on the Lego board fighting off their nearest rivals St Paulinus RC Primary School with 307 points and Ryehills Secondary School with 208 points. The group then impressed the judges with the wormery they had built at school to help improve the handling of waste in the kitchens. The children will now compete in the national finals at Loughborough University in the midlands on Sunday 21st February.
