

Governor support for Maths

The Year 6 children have welcomed the support of school governor Richard Laverick during a Maths after school club on Friday evenings. Richard is a secondary school maths teacher at Freebrough Academy. The children have received additional support from Mr Laverick and Year 6 teacher Mr Ormerod in preparation for their Year 6 assessments.

Some of the children will move on to Freebrough Academy in September therefore they have had a wonderful opportunity to get to know Mr Laverick and he has gained a valuable understanding of the children's mathematical skills before he teaches them in Key Stage 3.

As a school governor he has also gathered information about teaching and learning strategies used in Maths at St. Peter's. The children enjoyed the challenges Mr Laverick set and he was impressed with how they tackled them.
