

Moving Toys

Year 5 and 6 have been designing and making moving toys. After researching different moving toys and investigating cams, children designed their own toy based around their topic on Ironstone Mining.

Monday 3rd October

LO to Research moving toys.

hexagon. ✓

This is my favourite one because you can spin it as fast as you can and it looks like its dancing. I think its cam is either ellipse or

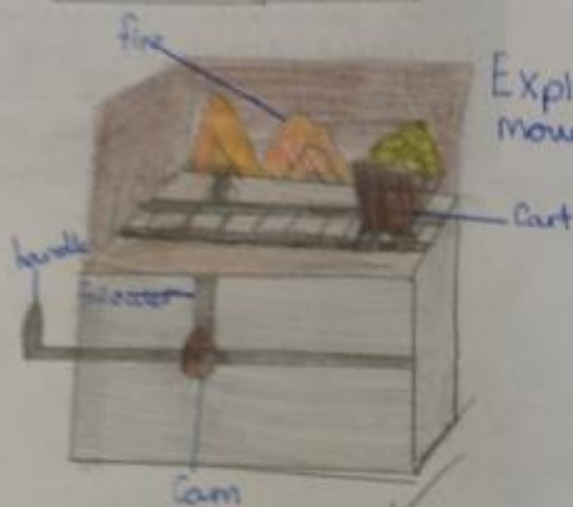

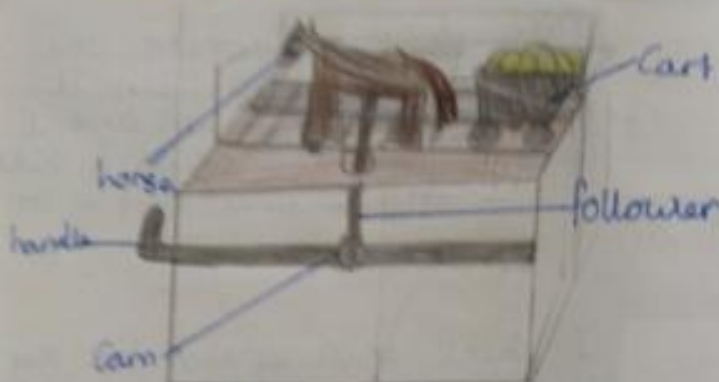

more than one thing moving. ✓

I think this would be my least favourite because all it would do is open its mouth then close I think its cam would be eccentric. It could be improved by

LO my ^{design} ~~design~~ for my moving toy

1. the horse is moving up and down

Explotion: the moves up and down
